

Since its foundation in 2000, Vitae Natural has become the first producer of natural sourced Vitamin E in Europe (Vitapherole®) with non GMO IP certification, and one of the world's main manufacturers of Phytosterol esters (Vitasterol® S-80 esterified). Our products are sold in more than 30 countries over the five continents to nutrition and food, pharmaceutical, cosmetic and feed sectors.

Vitae Naturals first exported to USA in 2003 and since then we are registered in the US Food and Drug Administration (FDA) as manufacturers of food ingredients and additives.

Due to the change in the FDA legislation all food companies must periodically renew their registration which involves being submitted to exhaustive inspections under the regulation 21 CFR 20.64 (d)(3).

Last April 2014, the Health and Human Services Department of the FDA conducted the first inspection at our facilities where also the Spanish Health Authorities attended.

The inspection was exhaustive and included the review of all most important aspects of our Quality System such as manufacturing process, traceability of our products, labeling, cleaning procedures, HACCP plan and training, among others.

The FDA inspection concluded successfully and "No objectionable conditions were observed and a FDA 483 Inspectional Observations was not issued".

There is no doubt that it has been one of the most important inspections Vitae Naturals has faced and a challenge to our company.
